The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 10, 15, 17, 18, 20, 21, and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kloptek (2002/0040199). Applicant's attention is directed to paragraphs [0028] and [0051-0055]. The Figure 7 embodiment discloses determining and monitoring of a safe speed to be used with particular energy application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 5, 11, 12, 16, 22, and 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kloptek (2002/0040199). The reference employs a safe scanning speed to adjust energy to achieve a safe application of the energy. It would have been an obvious reversal of parts to select the energy parameters and adjust the speed. Particular parameters and transducer shape are within the level of skill of the artisan to select to optimize performance.

Claims 1-5, 10-18, 20-22, and 25-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Friedman et al (2002/0082589) in view of Kloptek (2002/0040199). Friedman

et al disclose the basic system and method in Figure 13 including moving the applicator over the body area. Given the Kloptek teaching, it would have been obvious to determine and monitor speed of movement in Friedman et al to effect safe operation. Kloptek employs a safe scanning speed to adjust energy to achieve a safe application of the energy. It would have been an obvious reversal of parts to select the energy parameters and adjust the speed. Particular parameters and transducer shape are within the level of skill of the artisan to select to optimize performance.

Allowable Subject Matter

Claims 6-9, 19, 23, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art discloses similar devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee S. Cohen whose telephone number is 571-272-4763. The examiner can normally be reached on Monday-Friday, 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on 571-272-4764. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
